- RCON Tutorial

RCON Tutorial

Connecting to your server

rcon_address <server address>; rcon_password "RCONPASSWORDHERE"

Executing commands

To execute commands on your server through rcon, it is the same process as if you were typing them into the server console directly, except you must prepend the command with "rcon ". For example:

rcon changelevel cp_process_f12

rcon changelevel koth_product_final

rcon exec rgl_6s_5cp_scrim

rcon exec rgl_6s_koth_pro
