Server General Info

- Maintenance Periods

Maintenance Periods

Maintenance periods for all FullBuff servers (FullBuff or FullBuff Hosting) are currently set to this time frame in your local timezone:

0500-0700

aka

5:00am - 7:00am

Each of our servers is configured for the timezone it resides in.
During this time frame server/service outages can be expected. A full downtime period of up to 30 minutes will be considered normal. Any downtime periods that last longer than 30 minutes will be considered abnormal, and openly communicated as such.

(Primary form of communication at this time is our Discord server)

Monthly reboots of all nodes occurs on the 1st of the month.
